Gabriela MANCINI

FRONTEND DEVELOPER

ABOUT ME

I am a senior front-end developer, startup founder, and coding teacher. As a front-end developer, I have worked not only freelance but also in several companies. I think of myself as an emphatic and organized person which helps me to quickly understand the needs and goals of a project.

English

WORK EXPERIENCE

TELLab I Front end Engineer

2022

I collaborated to create a web application that allows students to develop tools, content and procedures to bring experiential learning techniques to courses that teach concepts related to human behavior, perception and cognition.

Digital House I Advanced Programming Teacher

2021 - 2022

I was part of the teaching team that created the program, topics, content and activities for Front End1 (HTML5 , CSS3, SASS, Bootstrap). Once this stage was finished, I gave classes to more than 300 students from Argentina and Colombia. I advised them, corrected their works and did a personal follow-up assignment.

Soy Focus I Frontend engineer

2019

I worked as Front End in an Angular team. My main task was to layout the designs I received from Zeplin. I also used Angular functionalities and linked the endpoints that were shared with me in Swagger.
The biggest challenge was how little time we had to complete the project. Our organization and good communication allowed us to face this problem.
